

The City of Robbinsdale offers 20 by 20 foot plots in Mielke Park, 4239 Halifax Ave N. for individuals who enjoy growing their own fruits & vegetables, but do not have an adequate light or space available at their primary residence.

The plots are divided by a 2 ft public pathway. We have installed a hand pump connected to a cistern system that allows for the collection of water run-off and rain which can be utilized by the gardeners. Please note that this system depends on rainfall and therefore water may not be available during dry conditions. You would be responsible for supplying your own water during those times.

For new renters, there is a limit of one plot per family, unless there are open plots after May 15<sup>th</sup>. Please indicate on the application form if you are interested in a second plot; but only include payment for one plot at this time. Please make sure you read and understand the rules as stated. Along with the signed rules sheet, all applicants must fill out and sign the application form. Your request will not be considered until we have the completed and signed application form, the signed rules sheet and payment to the City of Robbinsdale. The rules and application form can be downloaded from the website.

Please note, last year's renters receive priority for their plots. We will let you know by April 15 if there are plots available and you will receive notice confirming your garden plot location. We will not process your payment until you are assigned a plot.

Thank you for your interest in our program.
