

# Capital Improvement Plan 2021-2030

**City of Robbinsdale, Minnesota**

City of Robbinsdale

December 15, 2020

Dear Honorable Mayor and Council Members:

This public hearing is being held to consider and discuss the 2021-2030 Proposed Capital Improvement Program.

**2021-2030 Capital Improvement Plan**

We will be updating our formal ten-year Capital Improvement Plan (CIP) Document, which is published annually along with the Budget. This document is to be accepted every year as a planning tool. The document will show the recommended projects for the next ten years in the following sections:

- Government Buildings
- Park System
- Traffic & Transportation
- Utilities
- Capital Equipment

We have included summaries of the Proposed Projects in the CIP by section and an analysis of the funding sources. Acceptance of this plan document does not fund any of the projects. It does however set the priority that is needed for proper planning and execution of each project. All project funding will be included within the yearly adopted budget. The Council is being asked to review the CIP and provide staff direction regarding the prioritizing of capital projects.

The 2021-2030 CIP proposes a total of \$120,994,701 in projects. The total for each Section is as follows:

Government Buildings	\$12,562,260
Park System	6,052,500
Traffic &	50,869,241
Transportation	
Utilities	44,073,700
Capital Equipment	<u>7,437,000</u>
Total	<u>\$120,994,701</u>

There are a series of reports related to the CIP:

- Projects & Funding Sources By Department
- Projects by Funding Source
- Projected Financial Position 2021 - 2030

Details regarding the strategy for funding and a summary are provided within each section. Several future projects are identified to be financed with bond issues. The actual amounts of bond issues, timing and other funding options will need to be reviewed and discussed.

**Conclusion:**

The Council is asked to review the proposed 2021-2030 CIP and provide staff with direction.

Respectfully submitted,

Marcia Glick, City Manager

Concurrence:

Jeff Zuba, Finance Director

# **City of Robbinsdale, Minnesota**

## **Capital Improvement Plan 2021-2030**

### **CIP OVERVIEW**

---

#### **Capital Improvement Plan (CIP)**

The Capital Improvement Plan (CIP) is a planning tool that forecasts the City's capital needs over a ten-year period based on City-adopted long-range plans, goals and policies. The CIP includes detailed descriptions of every Capital Project the City anticipates to initiate during the ten-year period. The CIP is updated annually.

#### **CIP Goals**

The goals of the CIP are to:

- Provide a balanced program for capital improvements given anticipated funding revenues over a ten-year planning period.
- Enable the community to take a long-range view of needed improvements to determine responsibilities for future development.
- Enhance opportunities for participation in federal and/ or state grant and aid programs.
- Enable the City Council to evaluate the needs of the entire City objectively.
- Anticipate needed capital improvements in advance, rather than being overlooked until critically needed.
- Provide a plan for capital improvements that can be used in preparing the Capital Budget for the coming fiscal year.

#### **Project Details**

The Capital Projects detail being reported in the CIP will be shown within the following sections:

- Government Buildings
- Park System
- Traffic & Transport
- Utilities
- Capital Equipment

#### **Qualifying Criteria**

Capital projects must meet one or more of the following criteria to be included in the CIP:

- Implement Council-adopted plans and policies, including the Comprehensive Plan.

- Address health and safety needs, reduce City liability, or improve access to City facilities by those with disabilities.
- Maintain existing assets or improve the efficiency of City operations.
- Improve revenue potential or enhance existing programs.
- Respond to a request from a neighborhood group, citizen, government entity, or City advisory group.
- Be funded from within current and/or projected revenue streams (including additional operating requirements).

## **Capital Needs**

### **Rehabilitation & Preservation of Existing Capital Assets**

As an asset ages, it requires preservation to protect or extend its useful life. If an asset is not preserved, it will deteriorate prematurely and its benefit to the community will be lost. In addition, reconstruction costs are frequently four to five times the cost of preservation and maintenance. As a result, the CIP reflects the broad direction of the City Council to preserve existing capital assets before they fall into such disrepair that expensive rehabilitation or replacement is required.

The City currently maintains a wide variety of capital assets. These assets are categorized as follows:

- Government Buildings
  - Buildings & Structures
  - Building Improvements
  - Other Improvements
- Park System
  - Paths & Trails
  - Playground Equipment
  - Wading Pools
  - Ball Fields
  - Park Lighting
  - Docks & Piers
- Traffic & Transport System
  - Residential Streets
  - Alleys
  - Bridges
  - Parking Lots
  - Sidewalks
  - Street Lights
  - Traffic Lights

- Utility System
  - Distribution and Collection Systems
  - Well and Lift Stations
  - Water Storage Systems
- Capital Equipment
  - Furniture & Office Equipment
  - Machinery & Equipment
  - Mobile Equipment

## **Project Priorities**

The City of Robbinsdale as an established community is faced with the growing issue of replacing its aging infrastructure. Faced with the issue of finite financial resources, the City has undertaken a methodology of prioritizing projects so as to achieve the best return for the resources used. The priority assessment criterion is reflective of the City Council goals and initiatives.

The following assessment criterion is being used to rank each project within the CIP:

### Policy Criteria

- Financial Impact (cost of project and effect on future operational costs)
- Community Benefits (participation, ownership, quality of life impact)
- Environmental Benefits (future generations, impacts outside City)
- City Benefits (comprehensive plan, risk management, legislative requirements)

### Asset Management – Operational Criteria

- Remaining life
- Service requests
- Condition
- Risk history
- Criticality
- Demand / utilization

Each project (except capital equipment) was ranked on a score of 1 to 5 for each part of the assessment criterion. The final score was used to provide the initial priority rankings of all requested projects. Circumstances outside of the assessment criteria were taken into account prior to finalizing the included projects within the CIP.

The major sources of funds available for capital projects are dedicated funds. Dedicated funds must be used for a particular purpose. For the most part, these funds are accounted for in the City's special revenue, capital projects, internal service, and enterprise funds. The City may also receive direct funding for a project from other governments or through grants and donations.

Given the wide variety of specialized funding sources and the framework of adopted plans and policies, selection of projects for the CIP does not follow a one-size-fits-all priority setting process. The ranking of each project is reviewed within its functional area, with projects being selected based on a sense of the needs that have been identified through the priority assessment process within that area; the funding that is projected to be available (and the limitations on how it can be used); and any specific support or direction that has been provided by official advisory groups, neighborhoods, individual citizens, the City Council, outside agencies or other sources of input and guidance.

### **The CIP Development Process**

A Capital Works Committee has been established consisting of staff from the Administration, Engineering, Finance, Public Works, and Recreation & Parks departments. The Committee's objectives are the development and management of the CIP, and to maintain good communication to work through issues that arise regarding the City's infrastructure.

The CIP Development Process currently consists of the following steps:

- Call for the submitting of projects to the City Engineer in May through July.
- Initial ranking of all projects by the Engineering Department by September.
- Submit project ranking to the Capital Works Committee for discussion in September.
- Finance to develop funding scenarios in coordination with Engineering costs estimates in October.
- Submit draft CIP to Capital Works Committee for discussion in October.
- Hold work session with City Council to present and discuss proposed CIP in October / November.
- Adjust and finalize CIP for adoption by City Council in December.

Following the adoption of the CIP by the City Council, the projects in the first year are funded provided they have been adopted as part of the City Operating Budget Document. Projects in the CIP's second year become the basis of the subsequent year's capital budget.

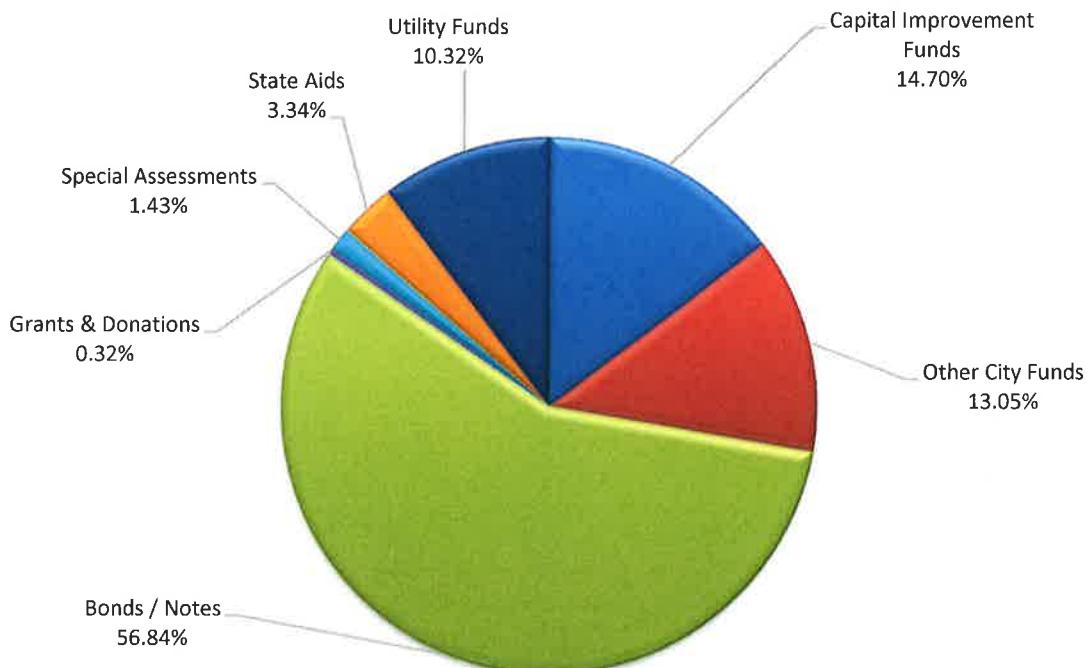

### **Policy Guidelines**

The City's Financial Management Goals and Policies provide the framework for financial planning and decision-making by the City Council, Capital Works Committee, and City staff. The Capital Improvements Policies as last revised by the City Council are located in the appendix section of the CIP.
