

Catalytic Converter Pack Marking Instructions

Catalytic Converter Pack includes:

- 1 Ultra-Destruct Security Label
- Metal Marking Fluid and Brush
- ISR Contact Card
- 2 Window Warning Labels

1. Ensure surface is clean, dry and free from dirt and grease
2. Ensure the catalytic converter is either cold or cool to the touch
3. Peel the label from the backing paper and place it firmly on the catalytic converter

4. Using the piece of backing material to avoid finger contact with the catalytic converter, press the label against it firmly to ensure a good bond

5. Apply the metal marking fluid to the laser-cut message. Ensure that all the holes are filled with fluid

6. Start the vehicle and allow to idle for approximately 2 minutes

Note: If the label is removed, the laser-cut message will still be visible.
